Brodware

Brodware

Bathroom fittings for life.

Designed and manufactured in Australia, Brodware's bathroom design solutions are carefully selected to be concise, engineered to be complete, and crafted to the highest quality.

We take our 'made in Australia' commitment very seriously which is why we are proud to still be designing, engineering and manufacturing our products in Australia. We are so confident of our Australian quality that our customers can now relax in the knowledge that their purchase is covered by a 20 year warranty.*

Brodware is the only Australian manufacturer offering a large range of high quality tapware and accessories made exclusively from solid brass metal. Unlike lesser chromed zinc and plastic alternatives, solid brass construction ensures durability, longevity and a trouble-free solution for your project. Our tapware is manufactured under an audited quality control system compliant to Australian Standard AS3718.

Being an Australian manufacturer we have full control over the quality of both our products and services, and with four generations specialising in architectural fixtures and fittings behind us, we understand the unique requirements of our country and can offer customisations on most of our products.

*Refer to our warranty terms and conditions for details

Classical Collection

The Classical Collection is the culmination of Brodware's 50 years' experience in delivering superior bathroomware. Incorporating eight unique ranges, the unifying theme in the Classical Collection is the seamless union of timeless elegance with modern craftsmanship and selection of genuine materials.

Brodware

ESTB. 1964

Five decades of manufacturing experience

Brodware has been committed to design authenticity, innovation and quality for over five decades. Our dedication to applying our ideology to our craftsmanship and service is equally unwavering. These long held beliefs guide our vision for an ideal environment where personal needs and desires are satisfied.

We take our 'made in Australia' commitment very seriously which is why we are proud to still be designing, engineering and manufacturing our products in Australia.

We are so confident of our Australian quality that our customers can now relax in the knowledge that their purchase is covered by a 20 year warranty.*

At Brodware we understand how important it is that you enjoy your bathroom; it's a place where you can relax, unwind and delight in your own personal time. We skilfully unite genuine materials, expert detailing, exquisite proportion and artisanal craftsmanship to create a personalised and luxurious bathroom environment.

Our tapware, fittings and accessories are the dynamic, three dimensional forms that deliver elegant silhouettes, detail and meaning to the space. They are the functional sculptures that don't just create a stylish room; they transform it into a truly personal retreat.

From a complete master bathroom suite to a single powder room hand towel, Brodware creates an experience that reflects our client's visions and their worlds. This is what makes Brodware truly unique.

As the result of our experience, Brodware possesses a distinctive perspective on the places where we spend our most personal time. Now and in the years to come, we remain focused on evolving what's possible within the bathroom, and delivering it seamlessly and effortlessly.

*Refer to our warranty terms and conditions for details.

Design

Craftmanship of architectural fittings

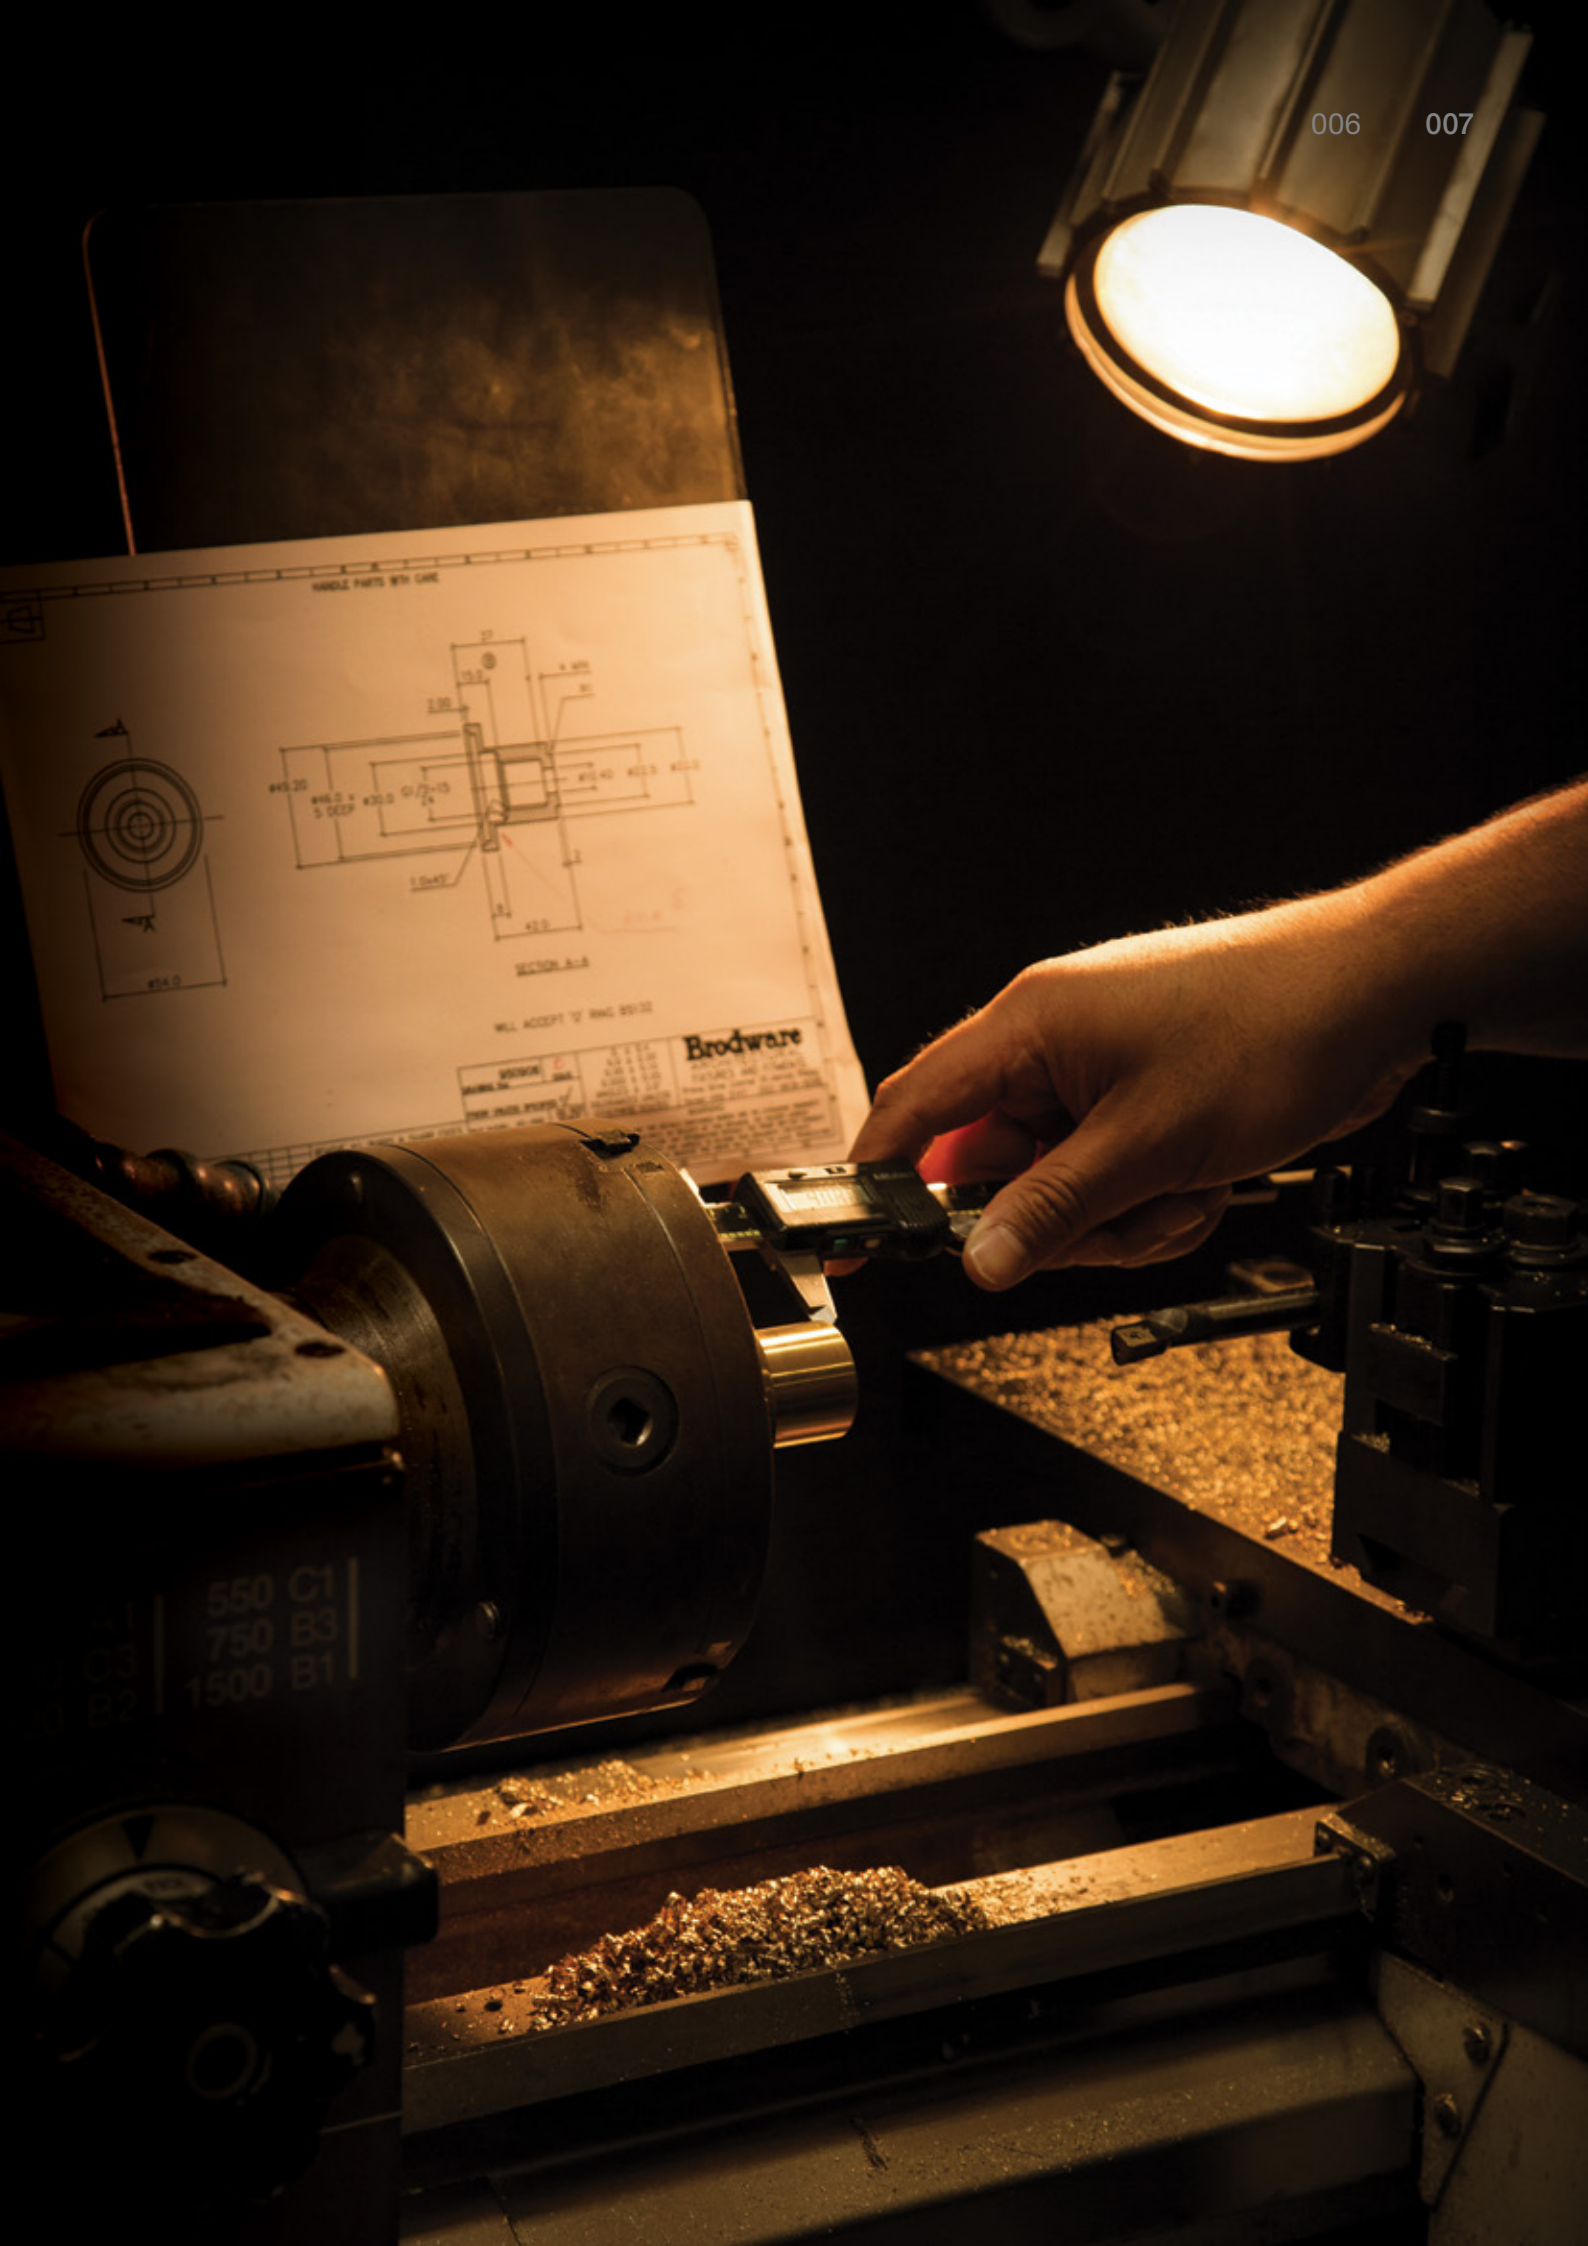

Designed and made in Australia, Brodware's bathroom design solutions are carefully selected to be concise, engineered to be complete, and are crafted at the highest quality.

You ask, we deliver. We work with the finest designers across a wide range of aesthetic inspirations to create an assortment of beautiful products which are also very functional. From old world elegance to modern organics, our quest to meet our clients' every need sees us innovatively challenging the boundaries of bathroom design. With over fifty years of experience distilled into signature fittings, surfaces and accessories, we bring you everything you need, and more.

Fully integrated into the Brodware approach is an expert understanding of design history and fabrication processes. This blend of scholarly appreciation and applied experience guarantees mechanical integrity, meticulous craftsmanship, and timeless designs.

Exclusive to Brodware is the sparkling Durobrite® Chrome finish. This superior unique chrome finish includes a deep nickel layer coated with hard chromium. When plated on brass metal, Durobrite® Chrome not only keeps your tapware looking newer for longer, it is a brilliant finish that is easy to clean and resists soiling.

Easy to use Easiglide® is a Brodware tap engine that utilises the latest in ceramic technology. Special lubricants allow smooth operation and precise temperature control, whilst ensuring reliability and low maintenance.

Brodware Finishes

Design without limitations

Embracing any imagination, Brodware offers a variety of custom finishes that can be applied throughout our entire range. This service enables us to customise and combine these finishes with products in a variety of ways to suit your needs.

Our abundant range of finishes and materials include distinctive handles in Swarovski crystal, and black or white porcelain – presenting untold options to make any space your own.

As an Australian luxury bathroomware manufacturer, Brodware helps create truly unique environments and experiences, with numerous selections allowing for special customisation options. As individual elements are layered throughout a space, Brodware products bridge multiple styles and please the most discerning eye. The result: a place where functional living is as personal as it is sophisticated.

Water is our passion

Our culture of conservation

As a reputable manufacturer of quality tapware fittings we use our water wisely. Your Brodware fittings – tapware, mixers and showers - will not just help you save thousands of litres of water, they will also help the environment.

The high efficiency of our products ensures performance well above industry standards. This is made possible through the use of Brodware's patented Broclean® water management technology which uses constant flow controls that are not affected by pressure.

All our tapware is WELS compliant. Furthermore, Brodware cares about our environment and the effects caused by the transformation of the materials used in the production of its products.

Because of this, we carefully select materials which have a low impact on the environment, from the raw materials and their transformation, to the manufacturing of a product, its disposal and the possibility of reusing the products.

Our commitment to the environment is not only achieved with 'green' action but mainly through a definite way of thinking by the company's management and employees.

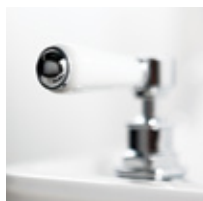

The raw materials and other substances used for production are chosen to provide both incredibly high quality for the final product and to guarantee the least possible impact on the environment.

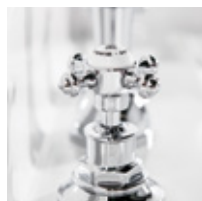

Our products are both functional and visually appealing, but go beyond simply the presentation of water; their production processes are designed to meet and exceed their obligations to government and environmental regulations. From development through to the selection of materials and production, Brodware focuses its attention on environmental sustainability.

By choosing Brodware you can be guaranteed you are doing your part in protecting the environment.

Subtle detail abounds in the Winslow Cross with a French-inspired design aesthetic combined with fine craftsmanship evokes a classic ambience from another era.

The Winslow cross uses the clean brilliance of inscribed porcelain to crown the exquisitely fashioned metal cross handle.

Old world style radiates from the Paris range,
conjuring characteristics from a fanciful era.

Fine ribbing and rounded contours create an
elegant silhouette that flows through the entire
range. Paris is lovingly crafted to endure the test
of time, and is fitted with Easiglide® tap engines.

Broclean® Water Management System

Brodware's patented Broclean® system delivers consistent savings regardless of pressure. Unlike some other systems, flows of +/- 0.5l/m either side of the relevant WELS benchmark are available from pressures between 150 to 1500kpa. The graph below shows a typical flow curve. The Broclean® filtration system where fitted, is located upstream of the flow controller for a more consistent flow.

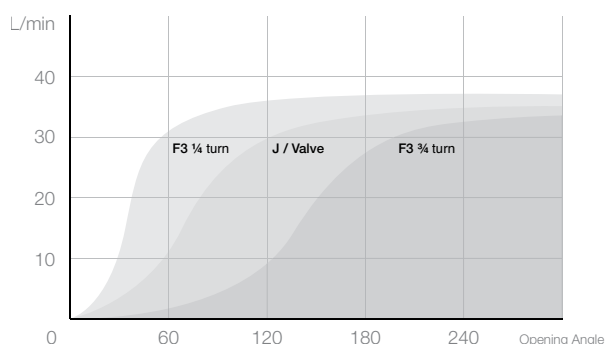

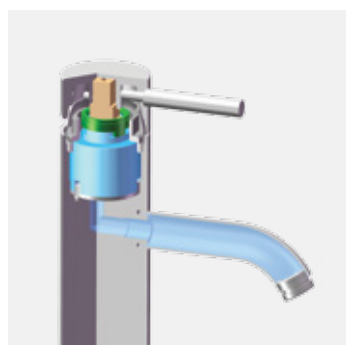

Easiglide® Ceramic Engine

Utilising special compounds, the Easiglide® ceramic engine is not only a breeze to use but the seals are water hammer resistant when used at recommended pressures. This is especially important with lever handle tapware.

Our Easiglide® F3 ceramic engines are fitted with noise suppressant screens for quieter operation. The Easiglide® F1 Mono Mixer engine incorporates a temperature selection ring (illustrated in green) which enables the hot water to be adjusted to a temperature to provide safety for children and save energy.

Easiglide® F3 Ceramic Engine maximum nominal flow comparison - without flow controller.
